First Core Project

Goals:

Our main goal was to create a team landing page wich presents all participating team members.

1. Landing page showing all team members.
2. 3 subpages representing every individual .
3. Video page with a short presentation of our project.
4. Project page wich represents our top pieces of work we have done to date.
5. Solid consistent header and footer wich spreads through all pages
6. Clean folder, file and code structure
7. Responsivness for different media types

Non-goals

1. Unecesarry bells and whistles – we were not trying to achieve clown status.
2. Not trying to implement unecessary things.
3. We were not trying to be a linkedin private page.

Anti-goals:

1. We did not want to have different header and footers on each individual page.
2. We did not want inconsistent layouts.
3. We did not want to consider the potential of uncertain reactions from future employers.
